Assigned: 15 January 2020

Project #1 – Coin flips

EE 511: Spring 2020

Due: Wednesday, 22 January 2020 at 14:00. Late penalty: 15% per day before 24 January at 14:00.

- 1. Simulate tossing a fair coin (a Bernoulli trial) 50 times. Count the number of heads. Record the longest run of heads.
 - a. Repeat the above experiment 20, 100, 200, and 1000 times. Generate a histogram for each showing the number of heads in 50 flips. Comment on the limit of the histogram.
- 2. Simulate tossing a biased coin 200 times where P[HEAD] = 0.80. Count the number of heads. Record the longest run of heads. Generate a histogram for the Bernoulli outcomes.
- 3. Simulate tossing a fair coin 100 times. Generate a histogram showing the heads run lengths.
- 4. Simulate tossing a fair coin and count the number of tosses until reaching a user-specified positive number of heads.
